DRY CARGO

Whatever the kind of your cargo, either agricultural or chemical, electronics, apparel and much more, we can provide end to end logistic solutions through a variety of services via sea, air, rail and road transportation.

Through our experience and well developed network, we provide the capability to our customers of combined transportation by using all means of modern transport, in order to achieve the optimal transportation of goods.

Atlantis co-operates with all major carriers, in order to provide high quality and flexible services to all destinations around the world.

Our extensive network of road freight providers gives us the opportunity to serve all European & Balkan countries, with daily departures, for full or partial shipments.

Our reefer specialists is one of your assets supporting your efforts to expand your sales.

REEFER CARGO

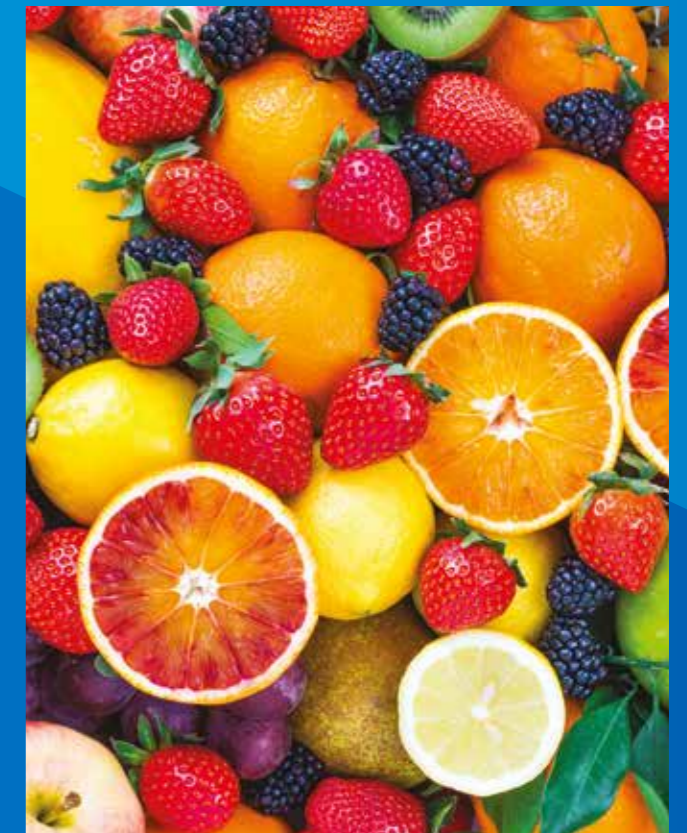

Being focused on reefer transportation the past decade, we are able to understand the need of perishable cargo reach further destinations.

Our dedicated reefer specialists give to your goods the attention needed, in order to arrive in peak condition, whatever their destination.

We ensure cargo quality by performing PTI (Pre - Trip Inspection) to each unit given for loading.

PTI includes cleaning of each container, checking the refrigerating unit and the genset that is going to be attached.

Frozen or chilled, our experts are ready to make the logistic part of your business easier, free of problems and un-expected events, as we understand the requirements of your supply chain better than anyone.

04.03 OUR SERVICES

No matter the size or its difficulty, we are able to provide you with the proper logistic solution.

PROJECT CARGO

Atlantis's experience can provide its customers a high quality of handling project cargo, moving of entire industrial plants or special equipment such as drills, cranes and other oversized tools, needed for worldwide projects in any part of the world.

By using cranes and special equipment for loading and unloading, special trucks and bulk vessels for overweight and oversized cargo, along with our expertise in custom formalities and necessary documentation, we guarantee smooth operation and on-time delivery to the final destination.

The fields that we have gained experience the past decade, is shipping of heavy lift equipment and complete trucks, yachts & cars of special dimensions, entire textile factories and equipment that is needed to build renewable energy parks such as wind turbines and solar systems, to the most remote areas of the world.
